

In the Utah Wildlife Board meeting on Aug. 26, 2021, the board voted to postpone receiving public comments on the trail camera recommendations until further surveys could be conducted on the issue. The recommendations regarding trail cameras, the use of night-vision devices and various other big game proposals that were made public for feedback on Aug. 23 will be presented to the public in a future meeting.

If you have any questions, please contact Staci Coons at stacicoons@utah.gov.

Which best describes your position regarding the 2022 fishing recommendations? Strongly disagree

Do you have any additional comments about the fishing recommendations?

Thank you for the chance to comment. As an AZ resident with plans to hunt UT, I do not support your recommendation to change the definition of a muzzleloader. the newest technologies like the Fierstick are much safer for my kids to learn muzzleloading because it eliminated overcharging, and you can easily determine if the gun is loaded. This recommendation is a step backwards for the state of UT as this system is so simple that more people will want to muzzleload.
